Dates given are those kept aboard the vessel; in general Russian ones are on Moscow time and the others on Greenwich Mean Time

\* indicates a voyage with passengers (109: 62 Quark, 43 Poseidon, 1 Murmansk Shipping Company, 3 Rosatomflot)

† indicates a voyage that crossed from the Atlantic Ocean to the Pacific Ocean, or *vice versa*, via the North Pole (7)

⌋ and ⌋ indicate that ships travelled in company

Superscript numbers are total and cumulative numbers of voyages, commands, flags, and fuel.

These data are from various sources including the compiler's voyages aboard Arktika class icebreakers. Several North Pole attempts failed after encountering palæocrystic ice with constraints of time: *Yamal* (Russia), Capt. Stanislav Rumiantsev, with passengers, attained 86°05'N on 13 July 2003, *Xue Long* (China) 88°22'N on 20 August 2010 and 87°39'N on 30 August 2012, *Oden* (Sweden), Capt. Mattias Petersson, 89°50'N on 12 August 2018, and *Kronprins Haakon* (Norway) 84°40'N on 13 July 2019.
